Top Skills

LangChain

Langgraph

Retrieval-Augmented Generation (RAG)

Certifications

Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization

Deep Learning Specialization

Tableau Business Intelligence Analyst

Sree Venkat Chintakula

AI/ML Engineer | Data Scientist | Data Analyst | Seeking Full-Time Roles | MS Data Science
United States

Summary

Data Science Enthusiast | AI Researcher | Power BI & Tableau | LLMs & RAG | Data Analytics & Visualization

I specialized in data integration, business intelligence, and visualization, leveraging tools like Oracle Data Integrator (ODI) and Oracle Business Intelligence Enterprise Edition (OBIEE) to drive data-driven projects.

Key Achievements:

Led data-driven initiatives, aligning business objectives with actionable insights.

Optimized end-to-end data integration processes using ODI.

Developed interactive dashboards & visualizations using OBIEE to enhance decision-making.

Currently:

Pursuing a Master's in Data Science at Indiana University Bloomington, diving deeper into Machine Learning, Deep Learning, and AI applications. I worked on a multi-modal deep learning project, analyzing gene data for Alzheimer's Disease detection by integrating MRI/PET imaging and DNA methylation data. Additionally, I am fine-tuning LLMs and RAG models for knowledge retrieval and enhanced predictive analysis.

Core Competencies:

Data Science & AI – Machine Learning, Deep Learning, NLP, LLMs, RAG

Data Analytics & Visualization – Power BI, Tableau, Python (Pandas, Matplotlib, Seaborn)

Business Intelligence & Data Integration – Oracle BI, SQL, Cloud Computing

Passionate about leveraging AI and data analytics to extract meaningful insights, enhance decision-making, and solve real-world challenges.

Always open to networking, collaborations, and discussions on emerging trends in AI, Data Science, and Business Analytics.

Let's connect and explore opportunities together!

Experience

Heartland Community Network

Data Scientist

June 2025 - Present (9 months)

Ellettsville, Indiana, United States

Indiana University Bloomington

Data Science Research Assistant

January 2025 - August 2025 (8 months)

Bloomington, Indiana, United States

Developed multimodal ML pipelines combining genomic, imaging, and cognitive metrics to model Alzheimer's progression, improving biomarker interpretability and prediction accuracy in longitudinal studies.

- Executed genome-wide association testing with dimensionality reduction (PCA) on >1 M SNPs using PLINK and R, enhancing statistical power and reproducibility of endophenotype analyses.
- Produced Manhattan and QQ plots and automated result validation scripts, reinforcing data integrity and cross-cohort consistency in research publications.
- Designed and evaluated LLM-assisted research workflows for summarization and semantic retrieval across 1,000+ scientific articles and study artifacts, accelerating exploratory analysis and literature synthesis.
- Fine-tuned LLaMA-2-8B using QLoRA for a domain-specific sentiment and text classification task on 10K+ labeled samples, benchmarking performance against prompting-only baselines and integrating the model into a RAG-based evaluation pipeline.

Cognizant

Data Scientist

April 2021 - July 2022 (1 year 4 months)

Hyderabad, Telangana, India

- Revamped enterprise ELT workflows by introducing materialized views and incremental ODI mappings, reducing nightly batch execution time from 90 to 55 minutes and improving data refresh frequency to hourly intervals.
- Modeled OBIEE data warehouses by designing the Physical, Logical, and Presentation layers with optimized joins, hierarchies, and time-series logic, cutting dashboard load time by 20–25% and enabling deeper executive analysis.
- Optimized PL/SQL procedures and ODI transformations across multi-schema integrations, improving throughput for financial and operational reports that supported weekly client performance reviews.
- Implemented data-validation and reconciliation checks that eliminated recurring data mismatches and reduced QA turnaround from two days to half a day, while mentoring junior analysts on ODI design patterns and OBIEE deployment standards.

Movidu Technology Pvt Ltd

Data Scientist

September 2020 - February 2021 (6 months)

Hyderabad, Telangana, India

- Designed and deployed a real-time safety-compliance detection system using ResNet-50 transfer learning, achieving 94% accuracy and reducing on-site violations by 40% in pilot deployments.
- Optimized TensorFlow training pipelines with data augmentation, learning-rate scheduling, and checkpoint callbacks, cutting retraining time by 60% and enhancing model generalization.
- Automated EDA and feature engineering workflows using scalable data pipelines and tracked experiments in MLflow to ensure reproducibility and traceability across datasets.
- Integrated edge inference APIs via TensorFlow Lite and FastAPI, enabling on-device real-time detections and reducing latency by 45% in production deployments.

Education

Indiana University Bloomington

Master's degree, Data Science

SRKR Engineering College

Bachelor of Technology - BTech, Electrical, Electronics and Communications
Engineering
